

Digital Solutions Inc

Position Title:	Application Specialist (Implementer)
Position Status:	Permanent, Full-Time
Specific Responsibilities:	Provide installation and configuration of custom applications to support our customers' business requirements and practices; as well as in-house testing/training environments. Install relational database engines such as Oracle and MSSQL as well as third party hardware and software. Perform, assist, test, and troubleshoot customer upgrades and system configurations. Assist in developing standardized installation practices and documents. Provide technical assistance by responding to inquiries regarding errors, and questions regarding products. Interact with other departments to resolve product issues and customer practices. Perform pre-installation analysis of customer infrastructure to determine appropriateness for proposed installation. Assist project teams with training tasks.
Required Skills and Qualifications:	Application installation and configuration in Microsoft and network environments, ability and willingness to travel both regionally, and nationally. Functional knowledge of operating systems and TCP/IP networks. Familiarity with relational database reporting applications such as Crystal Reports a plus. Ability to prioritize, and goal oriented. Can work independently and in teams. Good troubleshooting skills, and a love for technology and how things work.
Education:	Associate's Degree in Technology, or Computer Science. Or equivalent from two-year College or technical school, or one to three years related experience.
Qualification Process:	Resume submittal, Interview Process
Candidate Identified:	NO
